

## Job Offering

**ENEXSA** is a high-tech company providing consulting and software solutions for the power and energy-intensive process industries. A team of highly qualified engineers with many years of experience in the power industry advises utilities, independent power producers, EPC contractors and manufacturers of power plant components, mainly focusing on optimal process control to achieve project goals in terms of production capacity, efficiency, and availability. Based on extensive know-how in software development, ENEXSA develops turnkey software systems for customized applications to support power plant operations.

To strengthen our information and communication technology team (ICT), we are looking for a long-term position at our site in Grambach for a
